

2.3. Item 8: Jet Pump Package, 200HP Electric Motor, Warm Weather Design

- 200HP Electric drive motor
- W/200 Triplex pump with appropriate T.C plungers, set up for 300 pump RPM.
- Aluminum bronze fluid end with stainless steel stuffing boxes
- Force feed plunger lubrication system with 30 Gal day tank and crankcase splash lubrication system.
- Falk gear reducer and couplings.
- 200HP VFD with shutdowns for: discharge pressure, suction pressure, pump and lubricator oil level kills.
- Discharge manifold complete with flow meters, pressure gauge, block valve, and pressure safety valve.
- Suction manifold with duplex strainer and chemical injection ports.
- Thermostat controlled catalytic heater.
- Skid with approximate size 8'6" x 20', consisting of the following:
 - Oilfield type skid fully decked with grating.
 - Full containment
